

Natural Language Processing Open Resource License Agreement

Version 1.0 September 2002

Copyright 2002 CNLP Platform (<http://www.nlp.org.cn>), all rights reserved

Address :

**No. 6 Kexueyuan Nanlu, Zhongguancun, Haidian district
Beijing 100080, China**

This license agreement can be copied and distributed freely, but can not be modified under any circumstances.

This license is made for the open resources at “CNLP Platform” (<http://www.nlp.org.cn>).

If you want to use the open resources under the authorization of this license agreement, you should comply with the following provisions:

1. The RESOURCE mentioned in this license agreement refers to the software, the source codes, the program libraries, the documents, the dictionaries, or the corpus distributed at the “CNLP Platform” (<http://www.nlp.org.cn>).
2. All copyrights and intellectual properties of the RESOURCE are reserved to the original authors.
3. Users are free to use, copy and distribute this RESOURCE, but during this process, users should keep the integrity of the RESOURCE and distribute this license with the RESOURCE together.
4. The author will not provide technical support to users and are not responsible for any loss because of using these resources.
5. If users develop their own products or software based on this RESOURCE and sale them, it must be indicated in remarkable position in the products and software that the RESOURCE has been used in the products or software, and the author should be informed by written letter.
6. If users apply the RESOURCE in his research project, it must be indicated in remarkable position in the publications and the technical reports of the project that the RESOURCE has been used in the project and the author should be informed by e-mail or writing letter.
7. Users can modify and optimize the RESOURCE, in the condition that the integrity of the original resources is kept, that is to say, the original version of the RESOURCE should be able to be recovered from the modified or optimized version. In the modified or optimized version, the original author of the RESOURCE should be acknowledged. It is extremely appreciated for the users to publish their modified or optimized versions of the RESOURCE on the

‘CNLP Platform’ (<http://www.nlp.org.cn>) in order to promote the resource and development of Chinese natural language processing

8. If there is any infringement of the intellectual property of the RESOURCE or violation of this license agreement, the author has the right to stop use of the RESOURCE, and retain the right of claiming the financial compensation and the legal liability.
9. The terms of this license agreement may be updated. The new version of this license agreement will continue complying the idea of promoting the opening and sharing of the resource in the research area of natural language processing.

The new version of this license agreement will have a separate version number and publishing date. If it is not indicated explicitly in the RESOURCE which version of this license agreement is used, the user will be free to choose any version of this license. The new version of this license agreement will be published in the “CNLP Platform” (<http://www.nlp.org.cn>).

Appendix:

Question:

How to apply the “Natural Language Processing Open Resource License Agreement” in my resource which will be distributed?

Answer:

Please add the following lines in your distributed resources in remarkable position, for example the head of every source code file:

<The name and the brief introduction of the resources>

<The copyright holder> <Year> copyright reserved

<The contact information of the author>

The purpose of the distribution of this resource is to promote the academic exchanges and the resource sharing in the research area of natural language processing.

Users can freely copy, distribute or modify this resource, but it must be in full compliance with all the terms listed in “Natural Language Processing Open Resource License Agreement” (license version number 1.0)

The author will not provide any technical support to users and is not responsible for any loss of using this resource (directly or indirectly).
